

ÉMIRATS ARABES UNIS - AUH

## THE AIRPORT CHALLENGE

Forging the future of air travel using facial recognition for swift and secure passenger authentication.

## THE SOLUTION

Thanks to thee Signal Token Journey (STJ) solution the travel journey is seamless. This integrates biometric technology across key touchpoints - automated check-in, self-service baggage, and e-gates - enabling document-free, secure travel.

## THE RESULT

Processing times have dropped from 25 seconds to just 7 seconds, boosting efficiency and reducing resource dependency. By 2025, the goal is to implement this solution across all airlines, setting a new standard in smart, secure travel.
