Presentation

European leader in ecological engineering, advising and training the largest French airports in biodiversity and wildlife risk management. We offer tailor-made training and innovative solutions (AI) in France and abroad.

Activities

KEY FIGURES
- 1 in-house technical centre dedicated to airports
- 20 years of experience in the airport sector
- 30 airports supported worldwide
- 16 countries of operation
- 18 services dedicated to airport areas
- 180 airport references today
- 6 wildlife hazard management teams trained, including Roissy Charles de Gaulle and Orly in France

Biotope works for airports in the following 7 main areas:
- Biodiversity and ecological expertise
- Impact assessment for development projects
- Environmental project management assistance
- Ecological offset
- Wildlife risk anticipation and management
- Training and performance of Wildlife hazard management teams
- Communication on airport biodiversity
