

## PÉROU - LIM

## THE AIRPORT CHALLENGE

The Food Court sitting capacity was by the passenger traffic, as well as uncomfortable. It was necessary to improve both capacity and design in the context of the upcoming Pan-American Games.

## THE SOLUTION

An attractive design that optimized the available area

Increased sitting capacity without sacrificing comfort for the passenger

## THE RESULT

With a dramatically reinforced seating capacity and clarity on the same footprint, this project took into account the expectations of users as well as the Operator's and Maintenance prerogatives. The solution significantly improved the acoustics, lighting, capacity and organization of this important public space showing an impressive Before and After, generating a remarkable income for LAP.
