PROAVIA member use case

HOW CAN AN AIRPORT REPLACE AN OBSOLETE CONTROL TOWER WITH A MODULAR SOLUTION?

Mayotte·DZA – 2026

01 THE CHALLENGE

Replacing in record time an obsolete control tower at a lower cost on an international airport that is planned for relocation within 10 years.

02 THE SOLUTION

Assembling a modular building based on stacked converted shipping containers.

03 THE RESULT

A tool perfectly suited to air traffic controllers.
25 m² Air Traffic Control Room compliant with DGAC and international standards.
Adapted technical facilities, offices and a comfortable break room.
