PROAVIA member use case

COMBINE CO2 REDUCTION WITH OPERATIONAL BENEFITS AND COMMUNITY INVOLVEMENT ?

Côte d'Ivoire·FHB – 2026

01 THE CHALLENGE

Offsetting residual GHG emissions at airports without purchasing carbon credits

02 THE SOLUTION

A soil regeneration initiative on airport land called Soil.is

03 THE RESULT

- Soil.is was key to reaching the ACA 4+ level at FHB Airport
- Operational benefits: soil resistance to erosion and extreme weather events, reduction of maintenance costs
- Contribution to the airport's CSR ambitions and ESG criteria
