

ÉMIRATS ARABES UNIS - AUH

THE AIRPORT CHALLENGE

Forging the future of air travel using facial recognition for swift and secure passenger authentication.

THE SOLUTION

Thanks to thee Signal Token Journey (STJ) solution the travel journey is seamless. This integrates biometric technology across key touchpoints - automated check-in, self-service baggage, and e-gates - enabling document-free, secure travel.

THE RESULT

Processing times have dropped from 25 seconds to just 7 seconds, boosting efficiency and reducing resource dependency. By 2025, the goal is to implement this solution across all airlines, setting a new standard in smart, secure travel.
