

USE CASE

How to simplify the passenger journey with data protection ?

FRANCE – MRS

THE AIRPORT CHALLENGE

Simplify and accelerate the passenger travel process at any checkpoints with an inter-operable solution for any airline and/or airport.

THE SOLUTION

Fly'IN solution improves the passenger flow and documentary verification at boarding with an early stage enrolment. The process is GDPR compliant and anticipates the future Digital Travel Credential and EU Wallet standards for EU citizens.

The software solution is agnostic of any check-in and boarding equipment.

THE RESULT

Fly'IN solution has been deployed on multiple touch points (Checkin kiosk, Self Bag Drop Off, Boarding e-gate and boarding Pods).

This solution is interoperable with any airport, any airline and any equipment supplier.
