

CDG

AIRPORT CHALLENGE

Control the structural integrity of its walkways beyond the 20-year manufacturer's warranty period.

SOLUTION

- Gateway diagnostics using calculations and non-destructive testing to estimate the bridge's remaining service life
- Implementation of monitoring and periodic controls
- Supporting the client during renovation work to assess the immediate risk

RESULT

- A 12-year extension of equipment service life
- The final service life identified by Apave is 32 years
